

THE CUTTER

Synthetic Lubricant

DESCRIPTION

The **Cutter** is a synthetic lubricant effective in punching, sawing, machining, cutting, tapping, boring, and grinding operations on all steel and non-ferrous metals. The Cutter not only lubricates, but also cools the machining operations, allowing for longer tool life, and more precise machining.

FEATURES

- Increases production
- Lengthens tool life
- Transparency provides better visibility of work area
- 12 oz. aerosol

HOW TO USE

Spray area to be worked generously. Reapply as necessary to keep work area cool and well lubricated.

HMIS SYMBOL

Health	1
Flammability	3
Reactivity	0

SPECIFICATIONS

Physical Form	Liquid
Color	Clear
Odor	Characteristic
Specific Gravity	0.862
Flash Point (TCC)	41°F
